PROFESSIONAL SUMMARY

Dedicated and solution-oriented MERN Stack Developer with specialized expertise in React.js, Next.js, and Node.js. Proven track record of building scalable, user-centric web applications and SaaS solutions. Adept at creating responsive UIs with Tailwind CSS and integrating robust backend systems using MongoDB and Express.js. Currently expanding technical capabilities in TypeScript to enhance code quality and maintainability. Passionate about clean code architecture and performance optimization.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery.
Backend & Database: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication.
Tools & Version Control: Git, GitHub, VS Code, Postman, Figma (Basic), NPM/Yarn.
Core Competencies: Component-Based Architecture, Responsive Design, SPA (Single Page Applications), State Management, API Integration.

FEATURED PROJECTS

SaaS Analytics Dashboard | React.js, Node.js, MongoDB, Chart.js
Developed a comprehensive analytical dashboard featuring dynamic data visualization using Chart.js.
Implemented secure user authentication (JWT) and role-based access control (RBAC) for admin and user management.
Designed a responsive layout ensuring seamless usability across desktop and mobile devices.

Full-Stack E-commerce Application | MERN Stack (MongoDB, Express, React, Node)
Engineered a feature-rich shopping platform with product filtering, sorting, and search capabilities.
Built a complex shopping cart logic and integrated a secure checkout process.
Developed an admin panel for real-time product inventory management and order tracking.

Pro-Task Management System | React.js, Express.js, MongoDB
Created a collaborative task manager with full CRUD functionalities.
Implemented real-time updates and secure login systems to ensure data privacy.
Optimized database queries to ensure fast loading times and smooth user experience.

PROFESSIONAL EXPERIENCE

Junior MERN Stack Developer
Remote / Project-Based
Developing and maintaining full-stack web applications using the MERN stack, ensuring code quality and performance.
Collaborating with UI/UX requirements to translate Figma designs into pixel-perfect, responsive React components.
Transitioning existing JavaScript codebases to TypeScript to improve type safety and reduce runtime errors.
Writing clean, reusable code and conducting debugging to optimize application speed.

EDUCATION

Bachelor of Social Science in Economics
Dhaka College, Dhaka

KEY STRENGTHS

Problem Solver: Strong analytical skills to debug complex issues efficiently.
Continuous Learner: Actively learning TypeScript and system architecture patterns.
Team Player: Excellent communication skills (Bengali & English) and ability to work in Agile environments.
